Summary

Full Stack Web Developer and B.Sc. Computer Science student good in building scalable backend services and dynamic web applications. Proficient in Spring Boot, Node.js, and modern frontend frameworks, with a strong foundation in software engineering principles, and database.

Skills

- Languages: JavaScript, HTML, CSS, Java, C
- Backend & Frameworks: Spring Boot, Node.js, Express.js
- Frontend: React.js, Next.js, Tailwind CSS, Responsive Design, UI/UX Principles
- Databases: MongoDB, PostgreSQL
- Tools & Platforms: Git, GitHub, Vercel, Render, Postman, Tailwind

Education

- **B.Sc. in Computer Science**
  - FYBCS Semester 1: **9.55** / 10 SGPA
  - FYBCS Semester 2: **9.55** / 10 SGPA
  - SYBCS Semester 3: **8.64** / 10 SGPA
  - SYBCS Semester 4: **8.27** / 10 SGPA
- Higher Secondary Certificate (HSC) - 12th | 60%
- Secondary School Certificate (SSC) - 10th | 86%

Projects

1. iNoteBook | *Live Demo: https://inotebook-celll.vercel.app/*
   - Responsive cloud notebook app using the MERN stack with structured RESTful APIs for secure note management and data retrieval.
   - Implemented JWT authentication and password hashing (bcrypt) alongside React Context API for secure login and real-time state updates without re-renders.

2. Link Pool | *Live Demo: https://link-pool.vercel.app/*
   - Developed a full-stack link aggregation platform using Next.js and PostgreSQL (NeonDB) for ultra-fast, low-latency multi-link page rendering.
   - Engineered a good user interface backed by optimized SQL database queries and efficient state management for instant dynamic link updates.

3. ST Solar Project (Freelance) | *Live Demo: https://st-solar-collge-project.vercel.app/*
   - Gathered requirements from an academic client to engineer and deploy a custom web platform showcasing solar energy solutions.
   - Built reusable front-end components and modular CSS to optimize DOM rendering, delivering a fast, fully responsive live app on Vercel.

4. E-Commerce | *Live Demo: https://anshugupta-cell.github.io/eCommerce-frontend-components/*
   - Collaborated in a 2-member team for a college project, co-designing and engineering modern front-end e-commerce interfaces.
   - Implemented CSS Grid, Flexbox, and mobile-first UI/UX principles to build seamless, highly responsive layouts across all screen dimensions.

5. Interactive Jigsaw Puzzle | *Live Demo: https://anshugupta-cell.github.io/Puzzle_Jigsaw/*
   - Engineered a browser-based Jigsaw Puzzle game using HTML and JavaScript for real-time image slicing and manipulation. Compatible with both touch-gesture and desktop mouse interfaces.
